

E190P/125/IS/500 Roof fan

Usage: Insulated roof fan for ventilation. The pipe has a 50-mm built-in silencer. Inner pipe is made of perforated, galvanized steel and has a lip seal. A VILPE[®] pass-through according to the roofing material is required separately.

Dimensions: Duct size Ø 125 mm, external Ø 225 mm, height above roof approx. 500 mm.

Contents: Roof fan, screws, installation, operating and maintenance instructions. The P-series roof fans and exhaust ventilation pipes can be led watertightly with a pass-through set through a roof. VILPE[®] pass-through sets can be installed on any roofs with the most common pitches (less than 50 degrees). The pass-through set is always selected according to the roofing material of the roof. All the roof fans and exhaust ventilation pipes in the P-series are compatible with all pass-through set types. Using P-series XL roof fans and XL exhaust ventilation pipes requires an XL pass-through.
