

## DUCT TEMPERATURE SENSORS

### Duct temperature sensors TG-K

#### ■ Application

The ducts sensors are used jointly with PULSER-M temperature controllers.

#### ■ Design and control

The sensor is installed in the air duct. The sensors are supplied with connecting cable 1.5 m long and have adjustable length. The sensors differ in temperature sensitivity range.

#### ■ Mounting

The sensor is installed in the air stream area. It is connected to the wall through a flange with two 5 mm openings located at 40 mm center-to-center distance.
